

STRUCTURAL WOOD SYSTEMS

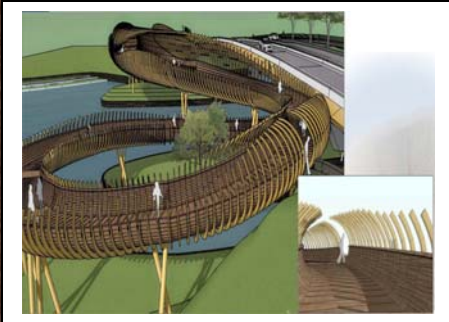

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

January, 2012

VOL 1 ISSUE 1

2011 was a year of change for Structural Wood Systems. Several employees retired, we expanded our product line, and acquired the addition of our new company President, Wayne Lee. 2011 was an improvement from 2010 and we are excited about the opportunity to serve you in 2012.

*CONCEPTUAL RENDERING OF THE
CHENGDU BRIDGE*

*Skilled Structural Wood Systems
craftsmen fabricating the members to the
projects exact requirements.*

PROJECT OF THE MONTH

CHENGDU BRIDGE

Phase one of the Chengdu Bridge Project was completed in December 2011. Structural Wood Systems' scope consisted of a complex series of laminated wood curved "ribs". The members were manufactured with Southern Pine lumber and pressure treated with Pentachlorophenol to maintain the natural beauty of the wood while adding years of life to the product.

Ultimately, phase one consisted of over 1,300 members, 300 different beam marks and 55 patterns. It took numerous man hours and over 50 years of laminating experience to manufacture and accurately fabricate the custom radial members.

The project was manufactured and containerized at our facility in Greenville, AI for export to China.
