

STRUCTURAL WOOD SYSTEMS

Division of Harrison Industries, Inc.

THE PINE PRESS

July 2012

VOL 1 ISSUE 3

In 2012, Structural Wood Systems vowed to move forward by increasing our gluing and production capabilities to be poised to meet market demand. We are happy to announce that not only are we meeting that goal, but are now working to meet the needs of our customers in the International Marketplace.

S.W.S. fabricated wood trusses for the Wallace Dining Hall, shown here while still under construction.

Fully concealed kerfed connections and plugged bolt holes

CUSTOMER TESTIMONIAL

"I just wanted to let you know that we appreciate the quality of work that is generated through your fabrication plant and I personally appreciate being able to ask you questions regarding tricky fabrication issues. Everyone that I have dealt with at Structural Wood has been great and I hope we can continue to work together in the future."

-- Laurie, Minnesota

FEATURED PROJECT

Montgomery Bell Academy Wallace Hall

The new 43,000 square foot Wallace Hall building is a unique and welcomed addition to Montgomery Bell Academy's 31 acre campus in Nashville, Tennessee.

Structural Wood Systems engineers and sales staff worked closely with Hastings Architecture Associates, LLC and The Parent Company (general contractor) to design a custom roof system to meet their project's structural and aesthetic requirements.

Frank Sledge, S.W.S. authorized sales representative, provided The Parent Company un-paralleled customer service throughout the process of developing the custom laminated wood roof trusses needed. The trusses consisted of curved bottom chords and fully concealed connecting hardware. The trusses were pre-fit and shipped factory assembled to ensure the highest quality laminated product available.
