

# STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

## THE PINE PRESS

3<sup>RD</sup> QUARTER 2014

VOL 3 ISSUE 3

Structural Wood Systems closed the 3<sup>rd</sup> Quarter by landing a monumental order on a full-size replica of Noah's Ark! Once completed, this will become the largest timber frame structure in the United States. Our team is eager to begin production on the Ark Encounter project, and are looking forward to the exciting possibilities the construction of the Ark will bring!

## FEATURED PROJECT The Ark Encounter

Photo Courtesy arkencounter.com

Structural Wood Systems is pleased to announce we will be partnering with The Troyer Group, Inc., and Crosswater Canyon, Inc. to provide the laminated materials for the production of the upcoming Ark Encounter project. The full-size replica of Noah's Ark will be located in Williamstown, Kentucky.

Ground preparation for the project is currently underway. S.W.S. Representative Glue-Lam Erectors, Inc., has been working hand-in-hand with the Architect and Owner in the negotiation of the project. A project of this size and complexity will require great precision, which we are happy to bring to the project.

Monitor the progress of the construction of the Ark Encounter by visiting [www.arkencounter.com](http://www.arkencounter.com).
