

STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

3RD QUARTER 2016

VOL 5 ISSUE 3

Structural Wood Systems would like to thank all our employees for their continuous hard work and dedication. They work tirelessly to ensure the products we manufacture are always just what the customer ordered. From the Engineering and Drafting Department, to the Laminating, Pattern, and Fabrication Departments, and our on site Steel Fabrication Shop, we are lucky to have such devoted and talented employees.

The large offset curves were made in two pieces. They were connected in the fabrication shop with shear plates, rods, and steel connections.

A time lapse video of the GROW exhibit construction can be viewed at slscgrow.squarespace.com/gallery/2016/5/25/grow-construction-progress.

This picture, from the Grand Opening of the Science Center Grow Exhibit, was sent by our Sales Representative, Boyd LaBeau.

FEATURED PROJECT

SAINT LOUIS SCIENCE CENTER GROW EXHIBIT

Structural Wood Systems was excited to provide our custom materials for the new GROW Exhibit at the Saint Louis Science Center in Saint Louis, MO. This new permanent exhibit focuses on agriculture and is the first of its size in the U.S.

SWS Sales Representative, Boyd LaBeau, worked with SWS Engineers and the Architectural Firm for several months to achieve this unique design. The new exhibit opened June 18, 2016 and had 3,400 visitors opening weekend.

The Saint Louis Science Center GROW Exhibit is a wonderful example of the beautiful custom glulam beams for which Structural Wood Systems is known.

We at Structural Wood Systems, look forward to helping future customer's bring their visions to life.
