

STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

1ST QUARTER 2018

VOL 7 ISSUE 1

It has been a busy first quarter here at SWS. We have completed several unique projects and had several guests come through for a tour of our facility. As building season kicks into high gear, SWS is looking forward to another wonderful year serving our customers. We have been working on several amazing projects and hope you will continue to call on us for all your glued-laminated wood needs.

SWS was excited to host Architecture students from Auburn University again this year. Students toured our plant and had the opportunity to see the scope of our work here at SWS. Students split into several groups and were able to visit each area of our facility guided by SWS employees from each of our departments.

Students also had a chance to visit our fabrication floor on their tour. They were able to see projects in different stages and have their questions answered by our experienced craftsmen.

FEATURED PROJECT

Custom Decorative Glulam

Structural Wood Systems recently completed work on a custom glulam project for Alabama Orthopedic Sports Medicine in Daphne, AL.

SWS Sales Representative Frank Sledge, in conjunction with Coast Architects, Inc. and Construction Managers worked together to meet the customer's needs. The decorative truss style beam will be at the entrance of the new office.

To ensure easier installation at the job-site, SWS assembled the two large pieces together to form the truss (pictured above). The assembled truss was wrapped and carefully loaded for shipment to the job-site. This type of project is a wonderful example of the quality workmanship and care SWS takes with all our projects.
